

From Vision to Venue – We Make it Happen

Exhibition Booth Fabrication

Founded in 2009, QICPL is a global interdisciplinary design studio that creates impactful custom retail, workplace and exhibit environments. We believe every space has a story to tell and our mission is to transform ideas into immersive environments that inspire connection, creativity, and lasting impressions.

Our approach integrates each client's unique brand voice into the very DNA of their space. By combining functional components, thoughtful material choices, and innovative structures, we create tailored solutions that merge architecture with product design, resulting in spaces that are both memorable and highly functional.

At QICPL, innovation, craftsmanship, and sustainability lie at the core of everything we do. With a team of design thinkers, architects, and fabricators, we manage projects end-to-end, from ideation to execution. Our in-house fabrication facilities enable us to deliver seamless solutions with precision and quality control.

Our portfolio spans diverse industries and geographies, giving us a global perspective and deep expertise in creating bespoke spaces for leading brands. Whether it's a retail flagship, an office environment, or a large-scale exhibit, we thrive on bringing ideas to life with a focus on detail, functionality, and brand storytelling.
